

CAREER SUMMARY

DevOps and Software Engineer with 6 years of experience delivering scalable applications and reliable cloud infrastructure. I am **Azure Administrator Associate (AZ-104)** certified and **Certified Kubernetes Application Developer (CKAD)** certified.

TECHNICAL SKILLS

DevOps Engineer: Docker, Terraform IAC, Terragrunt, Azure Kubernetes Services, Azure CI/CD pipelines, Azure DevOps, Azure Storage Accounts, Helm Chart Templating, GitHub Actions, AWS IAM, JFrog Artifactory, SonarCloud, Python, Kyverno.

Software Engineer: ASP.NET Core, Angular, Azure Application Insights, Azure Batch, AWS CloudWatch, AWS Secret Manager, MSAL Service, Azure MSSQL Server migration, Vue 3

PROFESSIONAL EXPERIENCE

DEVOPS & SOFTWARE ENGINEER | Ørsted (Renewable Energy) | Kuala Lumpur, Malaysia October 2022 – June 2026

- Reduced **Azure** resource provisioning time from **~1 day to under 30 minutes** by refactoring a shared **Terraform (IAC) project** structure applied across 22 state files, and **modularizing Azure Role Assignments (RBAC)** into project-specific configurations.
- **Enabled self-service** Azure resource provisioning through an Azure pipeline, allowing non-engineers to deploy infrastructure with minimal DevOps support, that automatically generating configuration files and triggering Terraform deployments to provision Azure resources.
- Accelerated Azure-to-AWS migration by implementing centralized GitHub Actions CI/CD workflows, improving deployment consistency and reducing duplicate efforts on workflow creation, reduce efforts of **3 days to 2 hours** in new apps deployment to EKS.
- **Optimized** large-scale Excel export performance by cutting memory consumption by **50%** for million-row datasets through migration from ClosedXML to **OpenXML** SDK within an **ASP.NET Core** worker service.
- Ensured application security and audit compliance by facilitating Windows Server upgrades, defining requirements and user stories, and working with network and infrastructure teams to manage firewall rules, load balancer updates, and environment configuration, supporting a critical reporting system used by **~150 users** across Denmark, UK, Asia.
- Enhanced system visibility and incident troubleshooting by migrating application monitoring to **OpenTelemetry** and integrating **AWS CloudWatch** and **X-Ray**, improving observability for an application used by **~50 users** across UK, Denmark, and Asia.

WEB DEVELOPER | GHL Systems Berhad | Kuala Lumpur, Malaysia

Nov 2021 – Sep 2022

- Migrated legacy frontend from Dojo Toolkit to Vue 3 and updated Java backend APIs to return standardized REST JSON responses, enabling compatibility with modern frontend architecture.

MIDDLEWARE DEVELOPER | DHL IT Services | Kuala Lumpur, Malaysia

May 2020 – Nov 2021

- Developed and enhanced enterprise middleware solutions using IBM ACE 11 and Software AG webMethods, supporting over 200+ message flow processes and handling up to 300K daily messages through IBM MQ for business-critical data exchange.
- Delivered ESQL-based enhancements, fixes, and feature improvements based on business requirements and technical analysis, ensuring reliable message processing and maintaining clear technical documentation for cross-team understanding.

EDUCATION

BACHELOR'S DEGREE | Computer Science | Yonsei University, Seoul, South Korea

2016 – 2020

LANGUAGE

English - Fluent (Professional) | Mandarin (Mother Tongue) | Korean – Fluent (Daily) | Malay (Intermediate) | French (Upper Beginner)
